

**Amendments to the Specification**

Please amend the specification by adding the following new paragraph, referred to as paragraph [06A] between paragraphs [06] and [07]:

[06A]           According to still another aspect, a blowby gas separation system for an internal combustion engine comprises a blowby gas transfer passage located externally of the engine and adapted to collect blowby gases from the engine. Condensing media in the transfer passage is adapted to condense oil from the blowby gases. Both blowby gases and condensed oil exiting the condensing media travel within the transfer passage in a common direction away from the condensing media.
